Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance: In the application filed 7/23/2002, applicant claims a polymer for a chemically amplified resist represented by the instant formula 1. The examiner performed a search of the relevant prior art, submitted a structure search that was performed by a PTO staff member, and considered the references listed on the PTO-1149 submitted 7/23/2002, which listed references cited on the PCT search report (all were "A" references). While a few references teaching similar polymers were found, none of the references obviated or anticipated the instant claims.

Kim et al (2003/0181629) is cited for its teaching of a polymer having all but one of the monomeric units.

Choi (6,165,680, 6,083,659, and 6,045,970) are cited for their teachings of similar polymers. However, while the reference teaches a monomer unit similar to the third of the instant polymer, it fails to teach or suggest a monomer meeting the structural limitations of the instantly claimed third monomeric unit.

Urano et al (5,976,759) and Park et al (6,395,450) are cited for their teachings of similar polymers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
